

# Financial Tear Sheet

## Corporate Profile

Since 1959, Generac has been a leading designer and manufacturer of a wide range of power generation equipment and other engine powered products serving the residential, light commercial and industrial markets. Unlike other generator manufacturers, power generation is the Company's primary focus, which differentiates Generac from its primary competitors that also have broad operations outside of the generator market. As the only significant market participant focused predominantly on these products, the Company has one of the leading positions in the power generation market in North America and an expanding presence internationally. Generac has one of the widest ranges of products in the marketplace, including residential, commercial and industrial standby generators, as well as portable and mobile generators used in a variety of applications. Other engine powered products designed and manufactured include light towers that provide temporary lighting for various end markets; commercial and industrial mobile heaters used in the oil & gas, construction and other industrial markets; and a broad product line of outdoor power equipment for residential and commercial use. Generac's power products are available globally through a broad network of independent dealers, distributors, retailers, wholesalers and equipment rental companies, as well as sold direct to certain end user customers.
