- o Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 2.02 Results of Operations and Financial Condition

On May 7, 2010, Generac Holdings Inc. (the "Company," "we," "us" or "our") issued a press release (the "Earnings Release") announcing its financial results for the first quarter of fiscal year 2010. A copy of the Earnings Release is attached hereto as Exhibit 99.1 and is incorporated herein by reference.

The information contained in this Current Report on Form 8-K (including the exhibits) is being furnished and shall not be deemed "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), or otherwise subject to the liabilities of that Section. The information contained in this Current Report on Form 8-K shall not be incorporated by reference into any registration statement or other document pursuant to the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in any such filing.

Discussion of Non-GAAP Financial Measures

In the Earnings Release, we present certain financial information, specifically Adjusted EBITDA and Non-GAAP Adjusted net income (loss), which are not in accordance with generally accepted accounting principles, or U.S. GAAP. We present Adjusted EBITDA and Non-GAAP Adjusted net income (loss) in the Earnings Release because these metrics assist us in comparing our performance across reporting periods on a consistent basis by excluding items that we do not believe are indicative of our core operating performance. Our management uses Adjusted EBITDA and Non-GAAP Adjusted net income (loss):

- · for planning purposes, including the preparation of our annual operating budget and developing and refining our internal projections for future periods;
- · to evaluate the effectiveness of our business strategies and as a supplemental tool in evaluating our performance against our budget for each period; and
- · in communications with our board of directors and investors concerning our financial performance.

We also use Adjusted EBITDA as a benchmark for the determination of the bonus component of compensation for our senior executives under our management incentive plans.

We believe that the disclosure of Adjusted EBITDA and Non-GAAP Adjusted net income (loss) offers additional financial metrics which, when coupled with U.S. GAAP results and the reconciliation to U.S. GAAP results, provide a more complete understanding of our results of operations and the factors and trends affecting our business for securities analysts, investors and other interested parties in the evaluation of our company. We believe Adjusted EBITDA and Non-GAAP Adjusted net income (loss) are useful to investors for the following reasons:

- · Adjusted EBITDA, Non-GAAP Adjusted net income (loss) and similar non-GAAP measures are widely used by investors to measure a company's operating performance without regard to items that can vary substantially from company to company depending upon financing and accounting methods, book values of assets, tax jurisdictions, capital structures and the methods by which assets were acquired; and
- · by comparing our Adjusted EBITDA and Non-GAAP Adjusted net income (loss) in different historical periods, our investors can evaluate our operating performance excluding the impact of certain items.

Item 9.01 Financial Statements and Exhibits

Generac Reports First Quarter 2010 Earnings

Waukesha, Wis., May 7, 2010 — Generac Holdings Inc. (NYSE: GNRC), a leading designer and manufacturer of back-up power generation products, today reported financial results for its first quarter ended March 31, 2010.

First Quarter 2010 Highlights.

- Net sales of \$130.7 million decreased 6.9% from net sales of \$140.4 million for the same period last year.
- · Net income was \$2.5 million versus net income of \$5.8 million in the first quarter of 2009. Non-GAAP Adjusted net income increased to \$20.1 million versus \$10.3 million in the first quarter of 2009.
- · Adjusted EBITDA increased 10.2% to \$31.8 million from \$28.9 million for the same period last year.
- · Initial public offering and subsequent debt repayment completed during the quarter, resulting in a significant reduction in leverage. Consolidated debt net of cash, was \$665.1 million as of March 31, 2010.

Operations Review

"We are pleased with our increased Adjusted EBITDA results during the first quarter of 2010. Despite difficult comparables in our residential markets and continued softness in our industrial markets, we were able to improve operating income versus the prior year quarter as a result of normalized commodity costs, cost reduction initiatives and the full impact of price increases that were implemented during the prior year quarter." said Aaron Jagdfeld, Chief Executive Officer of Generac.

Residential product sales of \$84.0 million decreased 5.1% in 2010 from \$88.5 million in 2009. This decrease was driven mainly by a stronger 2009 winter storm season compared to 2010 that impacted portable generator volume during the quarter. This was offset in part by year-over-year increases in sales of residential home standby products as a result of Generac's continued efforts to increase distribution and awareness.

Industrial and commercial product sales of \$38.3 million decreased 15.0% in 2010 from \$45.1 million in 2009. This decrease was mainly driven by continued declines in sales to industrial and commercial national account customers. Additionally, further weakness in U.S. non-residential construction activity has also had a negative impact on the market demand for commercial and industrial standby generators. Despite the overall decline in these markets, we are beginning to see pockets of improved demand in our light commercial products where we offer a lower cost, standardized back-up power solution for small footprint retail applications.

Gross profit margin improved to 39.3% of net sales in 2010 from 33.8% of net sales in 2009. Although we have seen recent quarter-over-quarter market increases in commodity costs, copper and steel in particular, gross margin in the first quarter of 2010 still benefited from lower commodity costs versus the prior year quarter. In addition, gross profit margins improved year-over-year due to price increases implemented during the first quarter 2009 and cost reductions implemented throughout 2009.

Operating expenses increased \$2.2 million to \$36.0 million compared to \$33.7 million in first quarter of 2009. A reduction in variable operating expenses due to lower sales volumes was more than offset by additional investments in product development, marketing activities, additional public company administrative costs, as well as \$1.2 million of stock-based compensation expense recorded during the first quarter of 2010 to account for stock options, restricted stock and other stock awards issued in connection with Generac's initial public offering over their vesting period.

Overall, Adjusted EBITDA margins increased to 24.3% in the first quarter of 2010 from 20.6% in the first quarter of 2009, driven mainly by the aforementioned improvements in gross margin.

Non-GAAP adjusted net income improved to \$20.1 million in first quarter 2010 from \$10.3 million in first quarter 2009. Improvements in income from operations coupled with reductions in debt service costs are the primary drivers of this increase. Debt service costs improved year-over-year due to debt prepayments, lower LIBOR rates, and the expiration of interest rate swap contracts in January 2010.

Cash flows from operating activities improved from \$0.1 million in the first quarter of 2009 to \$18.4 million in the first quarter of 2010. Improvements in operating income, reductions in cash interest and reductions in overall working capital levels contributed to this increase in cash flows from operating activities. Capital expenditures increased to \$1.6 million in the first quarter of 2010 compared to \$0.4 million in the first quarter of 2009 due to timing of expenditures.

Capital Structure

On February 17, 2010, Generac completed its initial public offering (IPO) of 18,750,000 shares of common stock at a price of \$13.00 per share. In addition, on March 18, 2010, the underwriters exercised their option to purchase 1,950,500 additional shares of common stock. Generac received a total of approximately \$247.6 million in net proceeds from the offering, after deducting the underwriting discount and total expenses related to the offering. Using proceeds from the IPO together with cash on hand, Generac made a \$360.1 million prepayment on its term loans during the first quarter of 2010, first to pay down its second lien term loan in full and then to repay a portion of its first lien term loan. Following this debt prepayment, Generac reduced its total debt balance to \$731.4 million of first lien term loan debt, with consolidated debt, net of cash, totaling \$665.1 million as of March 31, 2010. The Company has terminated its second lien facility and has no borrowings outstanding on its revolver, which has \$146 million of availability.

"Our improved balance sheet and strong cash flows will give us the flexibility to continue to execute on our growth strategy while reducing our debt leverage going forward," said Jagdfeld.

Outlook

Looking further into 2010, Mr. Jagdfeld commented, "We continue to be cautious about the economic environment as our end customers closely monitor big ticket capital spending. We believe that in the short term, we will continue to see similar year-over-year sales trends that we have seen over the last nine months, given weaker storm activity over the last several quarters and the softness in non-residential construction. We are confident that we will continue to

see the benefits of our expanded distribution, new product introductions and efforts to increase awareness of residential and light commercial stand-by generators in the second half of 2010. We have invested in future growth through increased new product development and marketing efforts and given our high market share in our focused end markets, we believe we are well positioned for growth as markets recover."

"We expect to maintain attractive Adjusted EBITDA margins as the impact of rising commodity costs will be more than offset by seasonal mix shifts and increased production volumes. We believe our cash flows will benefit from our strong margins, capital efficient operating model, favorable tax attributes, and improved balance sheet. While near-term market conditions are challenging, we believe that our business model will allow us to capitalize on the significant penetration trends driving our markets as the economic climate improves."

Conference Call and Webcast

Generac management will hold a conference call at 10:00am EDT on Friday, May 7, 2010 to discuss highlights of this earnings release. The conference call can be accessed by dialing (866) 804-6921 (domestic) or +1 (857) 350-1667 (international) and entering passcode 22484062.

The conference call will also be webcast simultaneously on Generac's website (http://www.generac.com), under the Investor Relations link.

The webcast is also being distributed through the Thomson Reuters StreetEvents Network. Individual investors can listen to the call at http://www.earnings.com, Thomson Reuters' individual investor portal, powered by StreetEvents. Institutional investors can access the call via StreetEvents (http://www.streetevents.com), a password-protected event management site.

Following the live webcast, a replay will be available on the Company's web site. A telephonic replay will also be available three hours after the call and can be accessed by dialing (888) 286-8010 (domestic) or +1 (617) 801-6888 (international) and entering passcode 42336045. The telephonic replay will be available for 30 days.

Annual Meeting of Stockholders

Generac Holdings Inc.'s 2010 annual meeting of stockholders will be held at 9:00am central time on Friday, June 4, 2010, at the Marriott Milwaukee West, W231 N1600 Corporate Court, Waukesha, Wisconsin 53186.

Generac company news is available 24 hours a day, on-line at: http://www.generac.com.

About Generac

Since 1959, Generac has been a leading designer and manufacturer of a wide range of backup power generation products serving residential, light commercial and industrial markets. Generac's power systems range in output from 800 watts to 9 megawatts and are available through a broad network of independent dealers, retailers and wholesalers.

Forward-looking Information

Certain statements contained in this news release, as well as other information provided from time to time by Generac Holdings Inc. or its employees, may contain forward looking statements that involve risks and uncertainties that could cause actual results to differ materially from those in the forward looking statements. Forward-looking statements give Generac's current expectations and projections relating to the Company's financial condition, results of operations, plans, objectives, future performance and business. You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. These statements may include words such as "anticipate," "estimate," "expect," "project," "plan," "intend," "believe," "may," "should," "can have," "likely," "future" and other words and terms of similar meaning in connection with any discussion of the timing or nature of future operating or financial performance or other events.

Any such forward looking statements are not guarantees of performance or results, and involve risks, uncertainties (some of which are beyond the Company's control) and assumptions. Although Generac believes any forward-looking statements are based on reasonable assumptions, you should be aware that many factors could affect Generac's actual financial results and cause them to differ materially from those anticipated in any forward-looking statements, including:

- · demand for Generac products;
- · frequency of major power outages;
- · availability of raw materials and key components used in producing Generac products;
- · competitive factors in the industry in which Generac operates;
- · Generac's dependence on the Company's distribution network;
- · Generac's ability to invest in, develop or adapt to changing technologies and manufacturing techniques;
- · Generac's ability to adjust to operating as a public company
- · loss of key management and employees;
- · increase in liability claims; and
- · changes in environmental, health and safety laws and regulations.

Should one or more of these risks or uncertainties materialize, Generac's actual results may vary in material respects from those projected in any forward-looking statements. A detailed discussion of these and other factors that may affect future results is contained in Generac's filings with the Securities and Exchange Commission, or SEC.

Any forward-looking statement made by Generac in this press release speaks only as of the date on which it is made. Generac undertakes no obligation to update any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

Reconciliations to GAAP Financial Metrics

To supplement the Company's condensed consolidated financial statements presented in accordance with US GAAP, Generac provides a summary to show the computation of Adjusted EBITDA, taking into account certain charges that were taken during the periods presented. The computation of Adjusted EBITDA is based on the definition of EBITDA contained in Generac's credit agreement, dated as of November 10, 2006.

Non-GAAP Adjusted Net Income

To further supplement Generac's condensed consolidated financial statements presented in accordance with US GAAP, the Company provides a summary to show the computation of Non-GAAP Adjusted net income (loss). Non-GAAP Adjusted net income (loss) is defined as Net income (loss) before provision (benefit) for income taxes adjusted for the following items: cash income tax expense (benefit), amortization of intangible assets, amortization of deferred loan costs related to the Company's debt, intangible impairment charges, and non-cash gains.

The presentation of this additional information is not meant to be considered in isolation of, or as a substitute for, results prepared in accordance with US GAAP. Please see our SEC filings for additional discussion of the basis for Generac's reporting of Non-GAAP financial measures.

Class B common stock	\$	1,109	\$	1,005	
Weighted average common shares outstanding - basic and diluted (2):					
Common stock (formerly Class A common stock)		35,748,290		1,736	
Class B common stock		10,941		24,018	
		,			

⁽¹⁾ Beneficial conversion feature related to Class B common stock and Series A preferred stock was reflected during the quarter as a result of Generac's corporate reorganization and IPO. See discussion of Generac's equity structure and corporate reorganization in the 2009 Annual Report on Form 10-K for the fiscal year ended December 31, 2009.

^{(2) 2010} Net (loss) income per common share and weighted average common shares outstanding reflect the corporate reorganization and IPO that occurred on February 10, 2010. The share structure prior to February 10, 2010 has been retroactively restated to only reflect the reverse stock split that occurred with the corporate reorganization. Because additional common stock equivalents would cause earnings per share to be anti-dilutive, basic and diluted earnings per share are identical.
